SUMMARY

"A dedicated technology enthusiast with a passion for exploring advanced technologies. A quick learner and critical thinker, excelling in dynamic IT environments to create innovative solutions."

EXPERIENCE

Unit Kegiatan Mahasiswa (UKM) Fintech

Universitas Syiah Kuala

Technology Leader

2023

As the leader of UKM Fintech, I oversee technological initiatives and work collaboratively with members to drive project development. The primary objective of UKM Fintech is to enhance financial literacy within the faculty using a technological framework. Engaging in innovative projects, I played a pivotal role in establishing a Fintech website dedicated to fostering financial awareness and delivering effective technological solutions.

Program Kreativitas Mahasiswa (PKM)

Universitas Syiah Kuala

Team Leader

2023

I lead the team as the Head of the Program Kreativitas Mahasiswa (PKM). My skills in teamwork and management were evident in the development of a dynamic PETA (Pemandu Wisata) website using the Laravel framework. This achievement allowed our project to successfully step into the national stage, reflecting our dedication and collaborative skills in developing innovative technology solutions.

Competitive Programming Training Website

In a team

Front-end Developer

2023

Involved in the development of a website specifically designed to improve programming skills, especially for participants in programming competitions. The main focus of work involved Front-end development with responsibility for creating submissions, profile, ranking, and scoreboard pages.

"Catat Yuk!" Mobile Application

In a team

Full-stack Developer

2023

During the process of creating the "note taking!" mobile application, I was responsible as a Full-stack Developer using the Java programming language. The focus of my work involved developing a CRUD system to record and manage notes, implementing a searching feature to improve the ease of access to information, and working on UI/UX so that the application has an attractive appearance.

Framework MERN (MongoDB, Express, React.js, Next.js)

Individually Developed

Full-stack Developer

2023

I developed an e-commerce website using the MERN framework independently. This project helped me understand and master the MERN framework (MongoDB, Express, React.js, Next.js) in website development.

Payment Gateway

Individually Developed

Full-stack Developer

2023

I designed and implemented a donation website using the Laravel framework. In the project, I created a payment gateway system using Midtrans as the main payment gateway API.

PROJECTS

Fintech Website

Project Link: [Fintech-UMKM](#)

Fintech is a website designed to help UMKM in marketing their products and managing the finances of their business. The Fintech website was created using Laravel and I as a full-stack developer on the project was responsible for creating rating features, dashboard charts, customer reviews, and product and financial CRUD.

Competitive Programming Training Website

Project Link: [Competitive Programming Training](#)

This website was created to guide students in finding accurate solutions to solving programming challenges. The development of this project uses the Laravel framework, with the use of React and Tailwind as front-end technologies. In this project, I acted as a front-end developer.

PETA (Pemandu Wisata) Website

Project Link: [Peta](#)

PETA (Pemandu Wisata) is a website designed for booking tour guides and providing job opportunities for tour guides through a registration form. Developed using the Laravel and Bootstrap frameworks, I, as the Front-end Developer on this project, was responsible for pages such as the landing page, hotel page, tour guide page, login page, register page, and contact page.

"Catat Yuk!" Mobile Application

Project Link: [Catat Yuk](#)

This application is designed to facilitate users in recording various information according to their preferences. Developed using Java, I work in the field of fullstack development.

E-Commerce Website

Project Link: [E-Commerce](#)

The website is designed to offer a variety of products. It is crafted using the MERN stack (MongoDB, Express, React.js, Next.js) framework. In this project, I played the role of a full-stack developer.

Donation Website

Project Link: [Donation](#)

This donation website was created to allow people to give their donations to those in need. This project was developed using the Laravel framework, and I integrated midtrans as a payment gateway API to support financial transactions on it.

"Scraping OLX

Project Link: [Scraping OLX](#)

OLX scraping project aims to get information about used cars such as brand, year, kilometer, and price of each used car. The project was created using the Scrapy framework in Python language.

SKILLS

- **Programming Languages:** Java, C, Python.
- **Web Development:** Javascript, React.js, Express.js, Next.js, Laravel.
- **Database Management:** MongoDB, MySQL.
- **Frontend Technologies:** HTML, CSS (Bootstrap, Tailwind).
- **Operating Systems:** Linux.

EDUCATION

Universitas Syiah Kuala

GPA: 3.78

Informatics
Banda Aceh, Indonesia

ORGANIZATIONS

Technology leader in the Faculty-level Unit Kegiatan Mahasiswa (UKM) Fintech and a member of the Google Developer Student Club.

HOBBIES & SOFT SKILLS

Learn to code, read books on self-development, technology, and finance, play sports, play chess, and explore new activities.
